# CASE study

## Overview

**Value:** £2m

**Form of Contract:** JCT 2016

**Duration:** 8 Months

**Client/End User:** Britvic UK

## Britvic Can Line 17

Main Contractor, Quantity Surveying and Commercial Management

### About this Project

New can line production plant built at Britvic's UK flagship manufacturing facility in Rugby. The new plant was built within a live manufacturing facility and therefore logistics and co-ordination was paramount for the successful delivery of the project.

The scope of work included basements, retaining walls, stainless steel effluent systems, drainage, slabs tanking and external works.
